

Lab 2 – TomCat & Java Servlet

Prepared by Daqing Hou

Updated by Yu Liu for EE368 2022 Spring

Objectives & Grading

- Install TomCat successfully: 2 points
- Make the hello world java servlet work with your TomCat successfully: 3 points
- Please provide screenshots in your report to prove your successful installation them

Installation+Tutorial

- Install Java 1.6.0_45 (Mac, Windows, Linux) if you don't have Java JRE and JDK installed
- Install Apache Tomcat 6.0.53
 - Start Tomcat (on Windows, click tomcatw.exe; on Mac/Linux, execute startup.sh)
 - Connect to localhost:8080 in a browser. If you see a GUI, congratulations!
- Duplicate the Java Servlet Tutorial on Slide 4

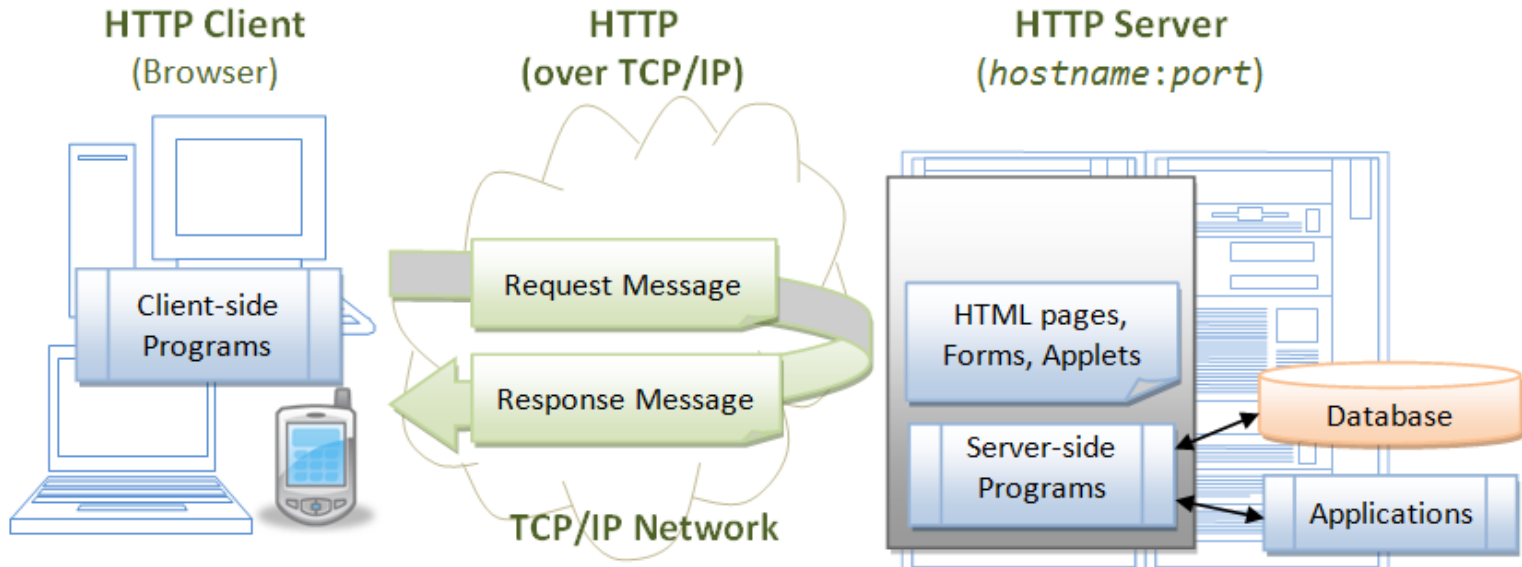

Apache Tomcat

- Install version 6.0.53, not the latest version
- Our project depends on 6.0.53!
 - It also depends on Java 6
- Video tutorial for Tomcat installation
 - Download binary from URL shown on next slide
 - Windows <https://www.youtube.com/watch?v=IX8xb-suzVg>
 - Mac
<https://www.youtube.com/watch?v=wIbJ7tc5oGE>

Java Servlet Tutorial

- <https://www3.ntu.edu.sg/home/ehchua/programming/java/JavaServlets.html>
- We will work on the Hello World example till section 3.4

Architecture of Web Applications

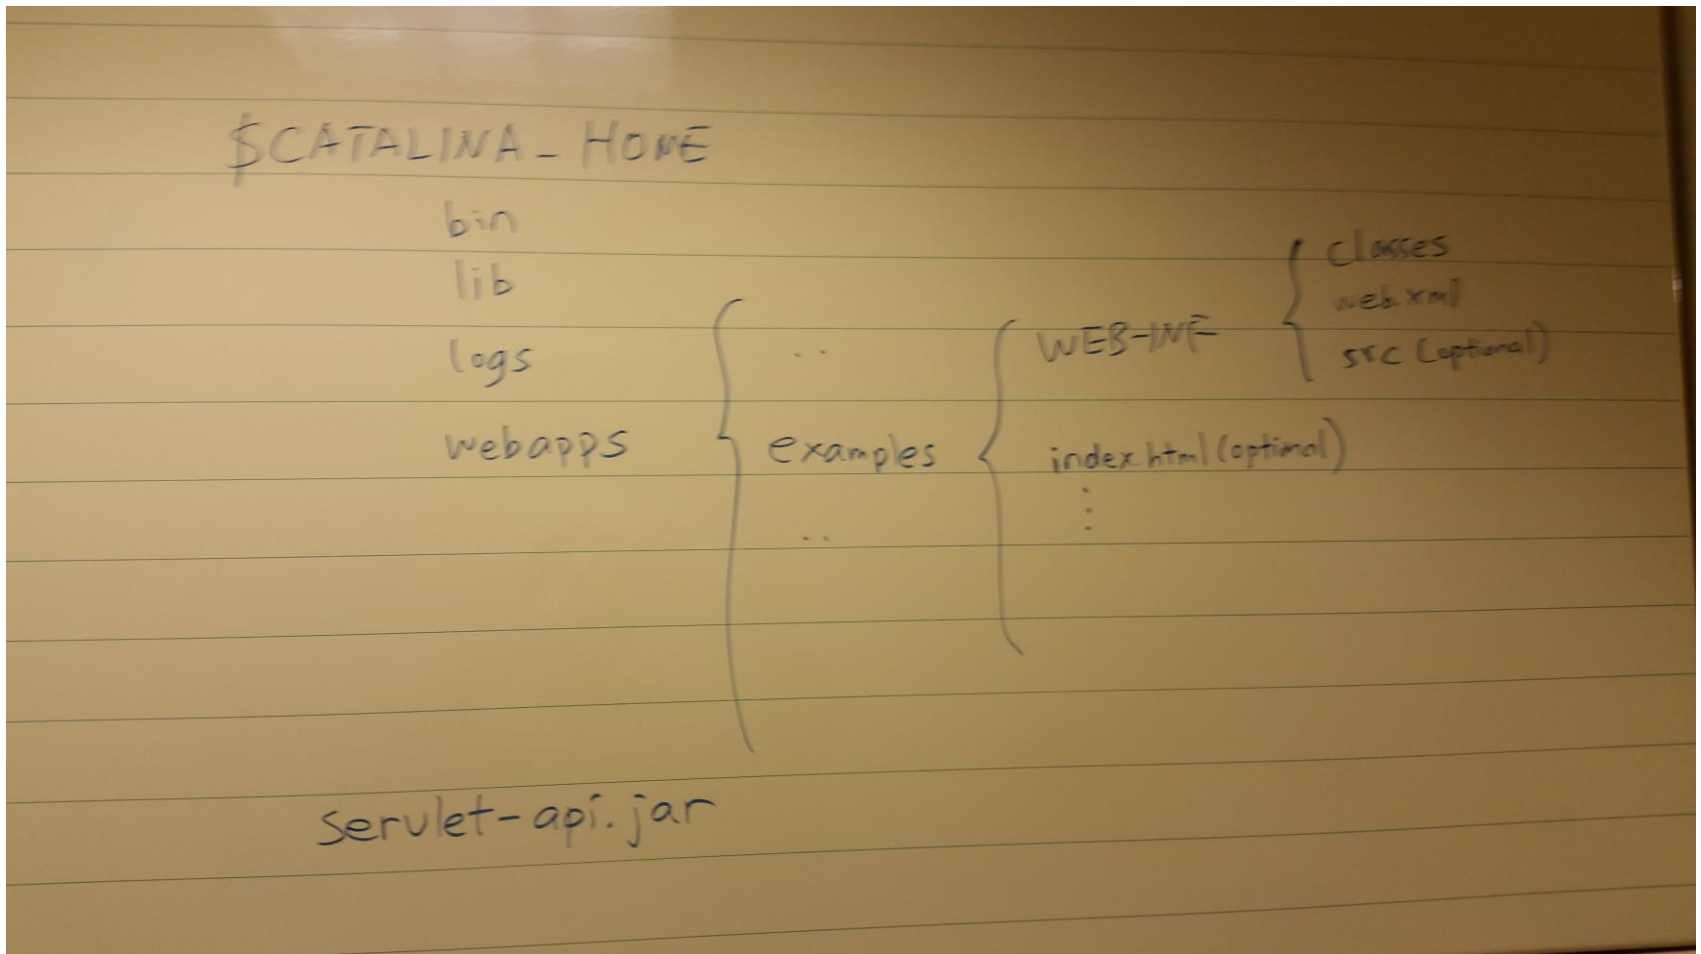

Application	HTTP
Presentation	SSL
Session	
Transport	TCP
Network	IP
Data Link	IEEE 802.11x
Physical	

Multiplexing (Port), Re-transmission
Addressing (IP Address), Routing

Start up / shut down Tomcat

- `cd $CATALINA_HOME`
- `./startup.sh` (non-windows) or `./startup.bat` (windows)
- `./shutdown.sh` (non-windows) or `./shutdown.bat` (windows)

Directory structure of Tomcat Web Application

Compiling servlet

- `javac path_to_java_files -d path_for_class_files -classpath path_to_jar_files`
- E.g.
 - `cd WEB-INF`
 - `javac src/mypkg/HelloServlet.java -d classes -classpath tomcat_root/lib/servlet_api.jar`

From HTTP Request to Servlet Class
